

WP 6 methodology

4th Workshop - of the DONAUREGIONEN+ project
17th and 18th March 2010
Budapest, Hungary

Jointly for our common future

WP 6 Crossdanube strategy development

WP 6

- *will evaluate the effects of cross Danube measures and linkages within CDR on NUTS 3 region, in which the particular CDR is located*
- *will propose the measures to overcome existing bottlenecks in CDRs, in order to contribute to the development of the NUTS 3 regions by improving and strengthening Crossdanube linkages*

Jointly for our common future

17th – 18 March 4th workshop Budapest 2

WP 6 Crossdanube strategy development

1st step

- Definition of CDRs according the model of time accessibility from centres of CDR
- Each CDR is defined by its centres, the area of the CDR will be determined by the time accessibility (agreed unit of time) regarding the transport network

Jointly for our common future

17th – 18 March 4th workshop Budapest 3

WP 6 Crossdanube strategy development

2nd step

- Identification of key stakeholders (regional self-government, municipal self-government (of major settlements), regional development agencies, euro regions, major private companies)
- Establishing of the working groups consisting of the representatives of the key stakeholders and project experts
- Agreement on schedule of the meetings of working groups

Jointly for our common future

17th – 18 March 4th workshop Budapest 4

WP 6 Crossdanube strategy development

3rd step

- Identification of relevant documents, measures and projects with focus on cross border linkages
- Assignment of the measures and projects to the particular indicators
- Some of the measures can affect more than 1 indicator (positively as well as negatively) and the most of the indicators will be affected by more than 1 measure, while some indicators can remain uncovered by the measures
- (We are working with modified set of indicators, the same as in WP5)

Jointly for our common future

17th – 18 March 4th workshop Budapest 5

WP 6 Crossdanube strategy development

4th step

- Quantification of the effect of cross border measures and projects on NUTS 3 region through relative weighted values of NUTS 3
- The relative weighted values are based on the evaluation of experts, and calculated according the method used in WP5
- SWOT analysis of the CDR regarding the cross border linkages
- Identification of bottlenecks – fields not covered by the measures
- Identification of the disparities between the opposite, cross Danube sides of the CDR (disparities between NUTS3 regions in which the CDR is located)

Jointly for our common future

17th – 18 March 4th workshop Budapest 6

WP 6 Crossdanube strategy development

5th step

- Identification of development scenario for CDR, according the predominant values of indicators (y values)
- CDR strategy development – proposal of the new measures with cross Danube effect in order to overcome existing bottlenecks

17th – 18 March Jointly for our common future
4th workshop Budapest 7

WP 6 Crossdanube strategy development

6th step

- Evaluation of new proposed measures on NUTS 3 indicators values („new“ y values)
- Relative weighted values of NUTS 3 indicators as a result of proposed measures (effect of cross border cooperation measures on whole NUTS 3 region)

17th – 18 March Jointly for our common future
4th workshop Budapest 8

Specific features of WP6

Focus on the evaluation performed by the stakeholders and experts within the working groups

Assessment of the effects of the Crossdanube linkages and measures within CDR through the changes in the values of indicators at the level of NUTS 3 regions

17th – 18 March Jointly for our common future
4th workshop Budapest 9

THANK YOU FOR YOUR ATTENTION !

17th – 18 March Jointly for our common future
